

FEMA EOC Assessment Checklist

INTRODUCTION

The following checklist will assist State and local governments in performing the initial assessment of the hazards, vulnerabilities, and resultant risk to their existing Emergency Operations Center (EOC), as described in the grant guidance for EOC Phase 1 of the FY 2002 supplemental funds. The questions have an operations focus and are intended to address whether a requirement for a particular capability exists, whether the EOC can provide that capability, and whether the provided capability is adequate. The checklist first asks questions about the physical features of a facility housing an EOC/EOC Alternate, and then addresses the characteristics of Survivability, Security, Sustainability, Interoperability, and Flexibility described in the grant guidance. The checklist may be used for State or local EOCs and, where applicable, State or local alternate EOCs. For this reason, some questions may warrant different responses depending on the type (State or local) or nature (primary or alternate) of the EOC.

When assessing the physical space of an EOC/Alternate EOC, include the area in square feet, the number of staff working a shift, and the ability to accommodate surge requirements.

When assessing communications capabilities, provide sufficient detail to assess the adequacy of that capability. For example, for telephones consider the number of instruments available, the number of lines (telephone jacks) in a room, and the capabilities of the telephone switch (e.g., can the switch support additional telephone drops, if required for surge operations). For computers, consider the availability of network connectivity and the capability of the network to handle increased traffic as a result of the increased activity associated with emergency operations. For radio devices, provide sufficient information to describe the type of device (portable transceiver, radio console), quantity of devices on-hand, quantity needed to support operations (normal and surge), and whether that quantity is adequate. Consider the availability of batteries, chargers, and spares for portable devices.

The checklist is a guide and is not intended to be all-inclusive. The scoring system was not part of the original FEMA document but was added to aid you in identifying those areas that need more attention. In conducting the initial assessment, address other concerns or issues that may not be included in the checklist.

Space is provided at the end of the checklist for this purpose.

FACILITY FEATURES

Facilities – examines the physical features of EOC facilities: sitting, structure, available space. EOC spaces to consider are an operations area, conference rooms, communications center, secure communications room, and multi-use space. Multi-use space is space that is not dedicated to EOC operations, but can quickly be made available to support EOC requirements for additional space during major disaster or surge situations.

PRIMARY EOC

Yes No Is there an EOC?

Is the EOC located in an

urban

suburban

rural area?

Yes No Is the EOC in the proximity of a government center (i.e., city hall, county courthouse, State capitol, etc.)?

- Yes No Do government executives/key officials have rapid access to the EOC?
- Yes No Is the EOC Staffed daily?
- Yes No Only day shifts are staffed
- Yes No All shifts are staffed 24 hours a day
- _____ How many personnel are on duty during a normal shift.
- Yes No Are additional government personnel readily available to augment the EOC should the emergency escalate beyond the capability of the on-duty EOC team?
- Yes No Have SOPs, SOGs, government policies and/or ordinances been established to allow local government agencies to utilize employees to augment EOC staff.
- Yes No Is the EOC in a centrally located site allowing rapid response to all parts of the jurisdiction?
- Yes No Is the EOC in an area that avoids congestion (i.e., transportation chokepoints such as inadequate thoroughfares, bridges, etc.) or debris from collapsing buildings?
- Yes No Is the EOC located in a facility that has structural integrity?
- Yes No Is the EOC located in an area where it can quickly be secured?
- Yes No Is the EOC located in a known high-risk area; e.g., floods, earthquakes, nuclear power plant, Hazardous Material (HAZMAT) sites, etc?
- Yes No If yes, explain. Are there any plans to mitigate risk?
- Yes No Is the EOC located near an adequate road network for ease of access?
- Is the EOC located in a building or below grade in a “shelter”?
- Basement
- Ground floor
- Upper floor
- Is the building/shelter housing the EOC
- Close to or
- Set back from a tree line?
- Yes No Does the building/shelter have adequate parking?
- Yes No Is the parking available in a parking lot or garage (above or below ground)?
- Yes No Does the building/shelter have space to accommodate a helicopter landing pad?
- Yes No Is the surrounding area sufficiently clear of obstructions to allow a helicopter to approach and land?
- Yes No Is the EOC in a Government owned or leased facility?
- Own Share Does the EOC occupy its own building/shelter or does it share a building/shelter with another organization; e.g., State or local police

headquarters, emergency medical services facility, National Guard armory, commercial building?

- Dedicated
- Multiuse

Is the EOC space dedicated (set aside and configured for EOC use only) or multiuse (not dedicated)? (Multi-use space is usually an office, administrative, or conference area that is used for day-to-day functions and can be made available to support emergency response and management operations. Typically, the day-to-day staff are displaced to another location.)

- Large Room
- Complex

Is the EOC one large room or is it a complex; i.e., several rooms that collectively comprise the EOC?

Does the EOC have space, whether in one large room or complex of rooms, for an

- Yes No Operations area (to perform emergency response and management functions),
- Yes No Conference/media room (for meetings and press briefings),
- Yes No Communications room (for centralized facsimiles, radios, and video teleconferencing [VTC]), and
- Yes No Secure communications (secure voice, facsimile, and VTC)?
- Yes No Does the EOC have a dedicated Operations Room?
- Yes No Is the space adequate to support the emergency response and EOC staff?
- Yes No Does the EOC have a dedicated conference/media room(s)?
- Yes No Is the conference room size adequate to support meetings and media briefings?
- Yes No Can the conference room be physically separated/isolated from the operations area so that media briefings do not interfere with on-going operations?
- Yes No Does the EOC have a dedicated communications room/center?
- Yes No Is the size of the communications room/center adequate to support EOC communications requirements?
- Yes No Does the EOC have a secure communications room?
- Yes No Is the space adequate to support cleared EOC staff and secure communications requirements?
- Yes No Does the EOC have designated multi-use space?
- Yes No Is the size of this space adequate to support expanded operations?
- Yes No Is the space readily available?
- Yes No Can the EOC support augmenting staff from Other Federal or State Agencies in a major disaster or surge situation?
- Yes No If not, can it be reconfigured or are there plans to provide the necessary space?

40 Possible Points

Points Earned _____ (YES ONLY)

ALTERNATE EOC

- Yes No

Is there and Alternate EOC?

Is the Alternate EOC located in an

- urban
- suburban
- rural area?

- Yes No Is the Alternate EOC in the proximity of a government center (i.e., city hall, county courthouse, State capitol, etc.)?
- Yes No Do government executives/key officials have rapid access to the Alternate EOC?
- Yes No Are additional government personnel readily available to augment the Alternate EOC should the emergency escalate beyond the capability of the on-duty EOC team?
- Yes No Is the Alternate EOC in a centrally located site allowing rapid response to all parts of the jurisdiction?
- Yes No Is the Alternate EOC in an area that avoids congestion (i.e., transportation chokepoints such as inadequate thoroughfares, bridges, etc.) or debris from collapsing buildings?
- Yes No Is the Alternate EOC located in a facility that has structural integrity?
- Yes No Is the Alternate EOC located in an area where it can quickly be secured?
- Yes No Is the Alternate EOC located in a known high-risk area; e.g., floods, earthquakes, nuclear power plant, Hazardous Material (HAZMAT) sites, etc?

If yes, explain.

-
- Yes No Are there any plans to mitigate risk?
 - Yes No Is the Alternate EOC located near an adequate road network for ease of access?
 - Is the Alternate EOC located in a building;
 - Basement
 - Ground floor
 - Upper floor or
 - Below grade in a “shelter”?
 - Yes No Is the building/shelter housing the Alternate EOC close to or set back from a tree line?
 - Yes No Does the building/shelter have adequate parking?
 - Yes No Is the parking available in a parking lot or garage (above or below ground)?
 - Yes No Does the building/shelter have space to accommodate a helicopter landing pad?
 - Yes No Is the surrounding area sufficiently clear of obstructions to allow a helicopter to approach and land?
 - Yes No Is the Alternate EOC in a Government owned or leased facility?
 - Own Share Does the Alternate EOC occupy its own building/shelter or does it share a building/shelter with another organization; e.g., State or local police

headquarters, emergency medical services facility, National Guard armory, commercial building?

- Dedicated
- Multi-use

Is the Alternate EOC space dedicated (set aside and configured for Alternate EOC use only) or multiuse (not dedicated)? (Multi-use space is usually an office, administrative, or conference area that is used for day-to-day functions and can be made available to support emergency response and management operations. Typically, the day-to-day staff are displaced to another location.)

- One Room
- Complex

Is the Alternate EOC one large room or is it a complex; i.e., several rooms that collectively comprise the Alternate EOC?

Does the Alternate EOC have space, whether in one large room or complex of rooms, for an;

- Yes No Operations area (to perform emergency response and management functions),
- Yes No Conference/media room (for meetings and press briefings),
- Yes No Communications room (for centralized facsimiles, radios, and video teleconferencing [VTC]), and
- Yes No Secure communications (secure voice, facsimile, and VTC)?
- Yes No Does the Alternate EOC have a dedicated Operations Room?
- Yes No Is the space adequate to support the emergency response and EOC staff?
- Yes No Does the Alternate EOC have a dedicated conference/media room(s)?
- Yes No Is the conference room size adequate to support meetings and media briefings?
- Yes No Can the conference room be physically separated/isolated from the operations area so that media briefings do not interfere with on-going operations?
- Yes No Does the Alternate EOC have a dedicated communications room/center?
- Yes No Is the size of the communications room/center adequate to support EOC communications requirements?
- Yes No Does the Alternate EOC have a secure communications room?
- Yes No Is the space adequate to support cleared EOC staff and secure communications requirements?
- Yes No Does the Alternate EOC have designated multi-use space?
- Yes No Is the size of this space adequate to support expanded operations?
- Yes No Is the space readily available?
- Yes No Can the Alternate EOC support augmenting staff from Other Federal or State Agencies in a major disaster or surge situation?
- Yes No If not, can it be reconfigured or are there plans to provide the necessary space?

38 Possible Points

Points Earned _____ (YES ONLY)

SURVIVABILITY

Survivability – sustain the effects of a realized potential risk and continue operations from the EOC or a fully-capable alternate location; (e.g., have an alternate EOC that can be activated and used if the primary is destroyed, damaged, or not accessible).

PRIMARY EOC

- Yes No Is the EOC located in a known high-risk area; e.g., floods, earthquakes, nuclear power plant, Hazardous Material (HAZMAT) sites, etc?
- Yes No Can the EOC survive the effects of relevant risks; e.g., natural and manmade hazards?
- Yes No Does the EOC have special structural capabilities that improve its survivability?
- Yes No Does the EOC have a collective protection system for;
- Yes No Chemical,
- Yes No Biological
- Yes No Radiological, or Nuclear (CBRN) agents?
- Yes No Does the EOC have protection from blast effects?
- Where is the EOC located;
- Basement
- Ground floor
- Upper floor or
- Below grade in a “shelter”?

8 Possible Points

Points Earned _____ (YES ONLY)

ALTERNATE EOC

- Yes No Is there an Alternate EOC location identified to assure continuity of operations (COOP)?
- Where is the Alternate EOC located;
- Basement
- Ground floor
- Upper floor or
- Below grade in a “shelter”?
- Yes No Is the Alternate EOC located in a known high-risk area; e.g., floods, earthquakes, nuclear power plant, HAZMAT sites, etc?
- Yes No Can the Alternate EOC survive the effects of relevant risks; e.g., natural and manmade hazards?
- Yes No Does the Alternate EOC have special structural capabilities that improve its survivability?
- Does the Alternate EOC have a collective protection system for;
- Yes No Chemical,
- Yes No Biological
- Yes No Radiological, or Nuclear (CBRN) agents?
- Yes No Does the Alternate EOC have protection from blast effects?

8 Possible Points

Points Earned _____ (YES ONLY)

SECURITY

Security – guard against potential risks and protect operations from the unauthorized disclosure of sensitive information; (e.g., have sufficient security and structural integrity to protect the facility, its occupants, and communications equipment and systems from relevant threats and hazards).

FACILITY

Is the EOC/Alternate EOC located in an;

- urban
- suburban or
- rural area?

Yes No

Are physical security measures (barriers, security cameras, etc) presently used in the EOC/Alternate EOC and are these existing security features adequate?

What security features, such as

- Access controls
- Barriers
- Secure areas and
- Surveillance devices are required?

Yes No

How is access to the EOC/Alternate EOC controlled? Is a badge or card-swipe system in use?

Yes No

Is it adequate to control access to the facility?

Yes No

Is it adequate to control access within the facility?

Yes No

Does appropriate staff have 24-hours access to the facility?

Yes No

Are there any access control systems (card access, elevators, lock-out stairwells) that, if non-operational, could preclude access to the facility?

If yes, what alternate plans are in place to ensure access?

Yes No

Can security capabilities be increased commensurate with higher threat levels (e.g., additional barriers, increased surveillance, additional guards)?

Yes No

Can areas where classified and/or unclassified but sensitive information is discussed be isolated from unauthorized/uncleared individuals?

Yes No

Does the EOC/Alternate EOC have an existing secure communications area/room?

Yes No

Does it meet FEMA-provided security requirements?

Yes No

Is the size (square footage) of the room adequate?

How is access to an existing secure communications area controlled?

Yes No

Are existing controls adequate?

12 Possible Points

Points Earned _____ (YES ONLY)

COMMUNICATIONS/NETWORKS

Yes No Do Local Area Networks (LAN) used in support of emergency operations have adequate protection against cyber attack (e.g., unauthorized access, denial of service, or malicious code)?

Yes No If not, what capabilities are needed?

Yes No Do State Wide Area Networks (WAN) used in support of emergency operations have adequate protection against cyber attack (e.g., unauthorized access, denial of service, or malicious code)?

If not, what capabilities are needed?

Yes No Do you have a secure voice capability?

Yes No If so, is it adequate to support your emergency operations needs?

Yes No Do non-secure telephones have a privacy feature?

Yes No Do you have a secure facsimile capability?

Yes No If so, is it adequate to support your emergency operations needs?

Yes No Are radio communications protected; i.e., encrypted or have privacy features?

9 Possible Points

Points Earned _____ (YES ONLY)

PERSONNEL

Yes No Are personnel with security clearances required?

Yes No Are there at least five (5) personnel with security clearances?

Are cleared personnel trained to:

- Yes No 1. Use secure communications equipment?
- Yes No 2. Control and protect classified material?
- Yes No 3. Manage and control communications security (COMSEC)?

Yes No Are individuals with a security clearance identified (e.g., unique marking on ID badge, recognition)?

6 Possible Points

Points Earned _____ (YES ONLY)

SUSTAINABILITY

Sustainability – support operations for extended durations; (e.g., be able to sustain operations 24/7 during all emergency situations without interruption; to the extent practical, be located in a place that is not a high-risk area for known hazards, such as flood zone, other natural hazard, nuclear power plant, hazardous material sites, etc.).

FACILITY

- Yes No Can the EOC/Alternate EOC support operations 24 hour a day/7 days a week for an extended period of time?
- Yes No Are operational and administrative supplies adequate to sustain operations; e.g., food, water, fuel for backup generators, paper products, office supplies, etc?
- Yes No Does the EOC/Alternate EOC have backup power? (Backup power typically refers to generator power.)
- Yes No Does the EOC/Alternate EOC have an uninterruptible power supply (UPS)? (UPS units typically use batteries to provide power for a limited duration; e.g., 10-20 minutes depending on the load.)

If yes, what systems/functions does the UPS support?

-
- Yes No Is the duration of the UPS adequate to support these systems/functions until the backup power to comes on line?
- Yes No Are Heating, Ventilation, and Air Conditioning (HVAC) systems centrally (buildingwide) or locally managed?
- Yes No Are HVAC systems available and controllable 24-hours a day, seven days a week (24x7)?
- Yes No Does the EOC/Alternate EOC have access to support areas; e.g., file rooms, server sites, and the like?
- Yes No Are there any special constraints that must be met to sustain operations?
- Yes No Special access needs?
- Yes No Does the Alternate EOC have the same capabilities as the primary location? If not, what are the differences?

11 Possible Points **Points Earned** _____ (YES ONLY)

COMMUNICATIONS/NETWORKS

- Yes No Is the number of telephones, secure or non-secure, adequate for the EOC/Alternate EOC to conduct emergency response and management operations?
- Yes No Are telephones connected to an in-house Private Branch Exchange (PBX)?
- Yes No Are telephones connected directly to a local commercial carrier; i.e., draw dial tone from the local switch rather than from the PBX? (These telephones are just like those found in a home or office. The advantage is that if the EOC/Alternate EOC loses power to the PBX, telephones connected directly to the dial central office will continue to function.)
- Yes No Is the number of facsimiles, secure and non-secure, adequate to conduct emergency response operations?
- Yes No Does the EOC/Alternate EOC have dedicated transmit and receive facsimiles?
- Yes No Does the EOC/Alternate EOC have a secure facsimile capability?

- Yes No Is the number of printers adequate for the EOC/Alternate EOC to conduct emergency response operations?

7 Possible Points

Points Earned _____ (YES ONLY)

INTEROPERABILITY

Interoperability – share common principles of operations and exchange routine and time-sensitive information with local jurisdictions, State-level EOCs, and FEMA’s network of operations centers; (e.g. be able to communicate with key State agencies, local government EOCs, emergency response teams at or near an incident site, near-by State EOCs, and Federal authorities to include the FEMA Regional Operations Center (ROC) as well as the FEMA Operations Center).

COMMUNICATIONS

- Yes No Does the EOC/Alternate have a requirement to monitor the communications of key emergency services; e.g., police, fire, emergency medical services (EMS), HAZMAT, and public works?
- Yes No Is there a requirement to monitor the communications of other services?
- Yes No If yes, does the capability exist and is it adequate?
- Yes No Does the EOC/Alternate have a requirement to establish an emergency communications network that includes the key emergency services and local EOCs/jurisdictions?
- Yes No If yes, does the capability exist and is it adequate?
- Yes No If a requirement exists, can the EOC/Alternate EOC communicate with the following entities:
- Yes No 1. Local EOCs throughout the State?
 - Yes No 2. FEMA ROC and/or FEMA Regional Staff?
 - Yes No 3. Federal Disaster Field Office (DFO)?
 - Yes No 4. EOC/Alternate EOC of other States?
 - Yes No 5. Operations centers of State-level emergency services organizations?
 - Yes No 6. Incident Commander or incident site command post?
 - Yes No 7. Operations centers of regional and local airport, highway, port, and waterway authorities; hospitals and ambulance service providers; nuclear power plants; dams; private sector utilities (power, telephone, sewerage, and water) and chemical companies?
- Yes No Are the EOC/Alternate EOC communications means adequate to satisfy communications requirements? (Consider radios, telephones, cell phones, available frequency spectrum, and other issues.)

14 Possible Points

Points Earned _____ (YES ONLY)

PROCEDURES

- Yes No Do the State and local government EOCs/Alternate EOCs have common operations, reporting, and communications procedures that will be used during the response to and management of an All Hazards event?

Yes No If the EOC/Alternate EOC has a requirement to exchange information with local EOCs/jurisdictions and key emergency services; e.g., police, fire, EMS, HAZMAT, and public works, are there procedures/checklists in place to facilitate the exchange?

Yes No If required, are scheduled reports assembled and disseminated?

3 Possible Points

Points Earned _____ (YES ONLY)

TRAINING

Yes No Do the State and local government EOCs/ Alternate EOCs conduct routine, recurring, or periodic joint communications training to exercise the communications capabilities that will be used during the response to and management of an All Hazards event?

Yes No If conducted, are the results of joint communications training maintained in a “lessons learned” document and used to improve communications operations?

Yes No Are the results also used to identify communications deficiencies and develop solutions that correct the deficiencies and improve communications capabilities?

Yes No Do the State and local government EOCs/Alternate EOCs conduct routine, recurring, or periodic joint training exercises to practice, test, and refine their common operations, reporting, and communications procedures?

Yes No If conducted, are the results of joint training maintained in a “lessons learned” document and used to improve common procedures?

Yes No Are actual experiences used to validate existing or create new common procedures?

6 Possible Points

Points Earned _____ (YES ONLY)

FLEXIBILITY

Flexibility – scale operations and adapt operational pace to the All Hazards event (e.g., have sufficient space, equipment, furniture, administrative supplies, and the like available to satisfy mission requirements).

FACILITY

PRIMARY EOC

Yes No Is space dedicated for an EOC?

Yes No If not, does the EOC occupy space within another organization’s facility; e.g., State or local police headquarters, emergency medical services facility, National Guard armory, commercial building?

Yes No Whether dedicated or shared, is the square footage available for the EOC adequate to conduct emergency response operations?

Yes No Is the EOC operational only when emergency response and management operations are being conducted?

Yes No Or, is the EOC operational 24x7 (staff and capabilities are present and active) whether or not emergency response operations are being conducted?

Yes No Are there activation, layout, and setup procedures for the EOC?

- Yes No Can EOC activation and operations be tailored to the scale of emergency response activities? (For example, a small-scale event might require the activation of fewer staff and capabilities, and the conduct of limited emergency response operations; a large-scale event, the activation of all staff and capabilities, and the conduct of extensive emergency response operations.)
- Yes No Have the conditions that would cause the EOC to be relocated been identified?
- Yes No Are there procedures for relocating from the EOC?
- Yes No Are EOC activation and relocation exercises held periodically?
- Yes No Is the level of participation by member agencies sufficient to ensure an efficient and timely activation during actual events?
- Yes No Do participants include key personnel assigned to the EOC?
- Yes No Is there a dedicated conference/media room in the general vicinity of the EOC?
- Yes No Is the square footage adequate?
- Yes No Is there multi-use space available in the general vicinity of the EOC?
- Yes No Is the square footage adequate? (Multi-use space is usually an office, administrative, or conference area that is used for day-to-day functions and can be made available to support emergency response and management operations. Typically, the day-to-day staff are displaced to another location)

16 Possible Points

Points Earned _____ (YES ONLY)

ALTERNATE EOC

- Yes No Is there an Alternate EOC identified and established to ensure COOP for emergency response operations?
- Yes No Is space dedicated for an Alternate EOC?
- Yes No If not, does the Alternate EOC occupy space within another organization's facility; e.g., State or local police headquarters, emergency medical services facility, National Guard armory, commercial building?
- Yes No Whether dedicated or shared, is the square footage available for the Alternate EOC adequate to conduct emergency response operations?
- Yes No Are there activation, layout, and setup procedures for the Alternate EOC?
- Yes No Can Alternate EOC activation and operations be tailored to the scale of emergency response activities?
- Yes No Have conditions been identified that would cause the Alternate EOC to be activated rather than the primary EOC?
- Yes No Does the Alternate EOC have the same capabilities as the primary EOC?
If not, what are the differences?)

- Yes No Are Alternate EOC activation exercises held periodically?
- Yes No Is the level of participation by member agencies sufficient to ensure an efficient and timely activation during actual events?

- Yes No Do participants include key personnel assigned to the Alternate EOC?
- Yes No Is there a dedicated conference/media room in the general vicinity of the Alternate EOC?
- Yes No Is the square footage adequate?
- Yes No Is there multi-use space available in the general vicinity of the Alternate EOC?
- Yes No Is the square footage adequate?

15 Possible Points **Points Earned** _____ (YES ONLY)

COMMUNICATIONS/NETWORKS

- Yes No Is the number of computers available in the EOC/Alternate EOC and any multi-use space adequate to support emergency response operations?
- Yes No Is the number of servers adequate to support emergency response operations?
- Yes No Is the number of telephones, both secure and non-secure, available in the EOC/Alternate EOC and any multi-use space adequate to support emergency response operations?
- Yes No Do the EOC/Alternate EOC and any multi-use space have telephones that are connected to a local dial central office? (These telephones are just like those found in a home or office. The advantage is that if the EOC/Alternate EOC loses power to the PBX, telephones connected directly to the dial central office will continue to function.)

Do any telephones have:

- Yes No Recording capability?
- Yes No Caller ID capability?
- Yes No Voice conferencing capability?

- Yes No Is the number of printers available in the EOC/Alternate EOC and any multi-use space adequate to support emergency response operations?
- Yes No Is the number of facsimiles available in the EOC/Alternate EOC and any multi-use space adequate to support emergency response operations?
- Yes No Do the EOC/Alternate EOC and any multi-use space have the capability to display video?
- Yes No If yes, do they also have the capability to distribute audio associated with the video display?
- Yes No Do the EOC/Alternate EOC and any multi-use space have a video teleconferencing (VTC) capability?
- Yes No Do the EOC/Alternate EOC and any multi-use space have the capability to receive public (intercom) announcements?
- Yes No Can the telecommunications capability be configured to support the scale of emergency response and management activities?

14 Possible Points **Points Earned** _____ (YES ONLY)

ADDITIONAL COMMENTS
