

Are you prepared

Prepare for ZOMBIES and survive other disasters

What's the difference between preparing for a Zombie attack or other type of emergency? Not much, well normally the un-dead are not chasing us during floods. Preparing to be self sufficient for 72 hours or more is recommended no matter what the emergency is. There are just not enough emergency responders or supplies for each and every home immediately after an emergency. It will take time to get both in quantities to everyone that needs help. How can you help yourself, build a kit, test your plans and be ready.
